With the Movers

Mr J F Bauer has rented the Val Mohr farm, just west of town, and will crop it the coming season.

Val Mohr's farm at Bright Bank has been rented to Mr Frank Hasse.

Mr John Goerz moves, next Monday, to the old Goerz farm the Baseline east.

Mr Henry E Miller, who had been farming south of Stony, has moved to Heather down district.

Mr V Unterschneitz, who moved to Stony from the farm last fall and has been living on First street, is moving back to the farm.

Mr Nanniezoff has purchased the Pailer farm at Glory Hills, and will move up to it next week.

Mr L H Enders, who recently purchased the Geo A Nichols Sr. farm at Blueberry, will move shortly to his new quarters.

Mr Henry Litke has rented the Al Ellis farm at Bright bank, and will occupy it the coming season.

Mr Joe Daekenter has purchased the Fred Dornbusch farm at Golden Spike. Fred is moving further south, on to the half section on the river bank purchased last fall from L B Busenius

Mr Charles Geistlinger is moving over, shortly, to his new location on the w. 1/2 of 25, 50, 28 wd., recently purchased from his brother. Mr Hy Shuster Jr has purchased the farm Charlie is vacating, and will move on to it next month.

Railway Time Table.

Going east—Every morning at 5.43 Mon., Wed., and Sat. at 6.55 a.m.

Going west—Sun., Tues, Friday at 1.29 p.m. Every midnight at 24.24.

LOCAL NEWS.

Messrs Art Mundt and G Davis left by train on Sunday for Mackay, to run a trap-line.

Mr Henry Umer, a former resident of this district but now of Vancouver, is visiting with old friends here, this week.

Mr Roy Alton spent the week-end with friends at Westlock.

J S Madore, of Edson, is the new operator in charge, at nights, at the local railway station.

Rev C Thies of Edmonton, missionary director for the Missouri Synod, has accepted the pastorate of the Lutheran Church, at Blueberry.

A youthful stray from Wababum, Kurt Deising, wandered in to Stony on Friday last, and was picked up and sent home. Stony is getting to be quite a haven for youthful wanderers from either direction.

Having decided to stay in Stony Plain district, Mr P Odenbach has cancelled his sale of goods and chattels, billed for Saturday, March 17

Mrs Denyz Maisemko arrived in Stony on Friday morning last. This lady had come all the way from Russia. She was met at the station by Mr and Mrs Markowitch and Mr and Mrs John Schmiegelski, who were friends of hers in the old country. The lady came over the Canadian Ry. route, of which the agent is Mr N M Ostzyniuk, 10310 101st St., Edmonton.

In Edmonton, on Monday, Armand Noel was sentenced to two months' imprisonment for theft, by Judge Crawford. Noel was the man who stole the pack-sack from the local station platform on Feb. 25.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, will be in Stony Plain on Friday, March 9th.

Auction Sale of Horses

Farm work horses seem to be rather scarce in this and surrounding districts at present, judging by the number of horses which are almost daily being brought in by local farmers, in preparation for the spring work. To meet this need, Auctioneer M Zucht has arranged for a sale of a carload of first class heavy horses, ready for the spring work. These will be on view at the local Stockyards on Thursday and Friday of next week, March 15 and 16, and the sale will take place at the Zucht livery barn on the afternoon of Saturday, March 17. These animals are the property of Messrs Thos Morrison and Thos Gartney, of Calgary. These horses should meet a ready sale, as they are all in first-class condition.

Where Is The Money To Come From?

With the Dominion Parliament and practically all the Provincial Legislatures now in session, the people of Canada are having their attention directed to questions of public policy, public finance, and public administration. The budget speech at Ottawa, and the annual financial statements of the several Provincial Treasurers, with the debates which arise thereon, are of outstanding interest and value in focusing attention upon, and compelling consideration of, the vital subjects of revenues versus expenditures, and their effect upon taxation and public debt.

Prior to the opening of Parliament and the Legislatures, members of the various Governments were busy receiving deputations from organizations of all kinds, including financial, industrial and commercial institutions, organized farmers, and numerous social reform and benevolent societies. In the vast majority of cases these deputations advocated certain changes in existing laws calculated to advance the interests or cause in which they were more especially interested. Also in the majority of cases, representations were made in support of reductions in existing taxation, and, coupled with such representations, Governments were urged to embark upon additional services, or provide new institutions, all of which called for large increases in public expenditure and the creation of new administrative services.

The problem with which all Governments are thus confronted, and which is presented to them every year, is most complex, and it is to be feared that many of these deputations do not give serious enough consideration to it. Many spokesmen for these deputations seem to labor under the delusion, — a fairly general one, — that Governments have some magic means of finding money without raising it by means of taxation.

For example, in all Provinces there is a persistent and growing demand that very much larger amounts be spent in the construction of good, all-weather, highways. Once built such roads must be maintained, thus for every mile constructed there is required annual charge for up-keep. But coupled with these insistent demands there is the further complaint that automobile licence fees are too high and should be reduced, while municipalities are ever demanding that, while the Provincial Government shall build and take over the maintenance of roads, the auto licence fees should be divided with the municipalities. In other words, the Government should spend more and collect less.

Note another example. The people of Canada demand the establishment of a system of Old Age Pensions. The Federal Government agrees, and undertakes to pay fifty per cent. of such pensions, provided the Provincial Governments pay the other fifty per cent. British Columbia, Saskatchewan and Manitoba agree to enter the scheme. All parties in the Legislatures are in favor of doing so. Then, in Manitoba, the Government proposes the imposition of an additional tax in order to raise the money wherewith to pay such pensions, and immediately objections are raised.

In Saskatchewan within recent months the Government has been asked to provide for a free consultative clinic, for a school for the blind and the deaf, for an institution for the care of juvenile delinquents, larger facilities for the training of teachers, extension of the educational system, another sanatorium to combat tuberculosis, a large extension of the road building programme, including the graveling of roads, etc., etc. The Government proceeds to some extent to give effect to a number of these requests and to assist in securing the necessary funds proposes a tax on gasoline. This meets with approval, but immediately a demand is made that the auto licence fee be substantially reduced, the effect of which would be to largely offset the increase in revenue to be derived from the gasoline tax, and leaving the Government without the means to provide those very things the people had demanded.

Referring to this all too general attitude on the part of people, and the increasing demand for "free" services of one kind and another, the Provincial Treasurer of Saskatchewan took occasion in his budget speech to point out that "there isn't so much as a 'free' service. Any service if not paid for by the ratepayer must be paid for by the state, and if the state pays, then the money with which to foot the state's bills must be secured from individuals in the mass by way of taxes.

The responsible heads of all our Canadian institutions and organizations should devote a portion of their time in training for such responsible posts by taking a course in economics.

Marie—"Have you had any success in your work with cannibals?"

Missionary—"Yes, we've taught them to eat with knives and forks."

Denmark was one of the first of the European countries to start factory inspection by women.

Riches may not buy happiness, but some folks would be happy if they only had enough money to make the experiment.

Musical Teacher: Who can tell me the national air of Italy?"

Bright Boy: "Garlic."

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Western Canada Aviation

Three New Planes Are Under Construction In Winnipeg

Application for a charter has been made by the Canadian Aircraft Company of Winnipeg, incorporated at \$50,000. This company which has already three of its new Mallard type planes under construction in its Lombard Street shops, expects to find a growing market for airplanes in Western Canada. The machines are 3-passenger single-bay biplanes with Rolls Royce engines, costing \$2,300. Commercial aviation is making progress at Winnipeg. The Western Canada Airways has placed an order for six more Boeiser airplanes and when delivery is made will have a fleet of twelve planes.

A New Slip

Did you know that a fifteen-cent envelope of Diamond Dyes will duplicate any delicate tint that may be the vagary in fancy underwear? Keep your oldest lingerie, stockings too, in the shade of the hour. It's easy if you only use a true dye. Don't streak your nice things with synthetic tints.

Dye or tint anything: dresses, or drapes. You can work wonders with a few, inexpensive Diamond Dyes (true dyes). New colors right over the old. Any kind of material.

FREE! Call at your druggist's and get a free Diamond Dye Cyclopedia. Valuable suggestions, simple directions. Piece-goods color samples. Or, big illustrated book Color Craft free from DIAMOND DYES, Dept. N9, Windsor, Ontario.

Diamond Dyes

Just Dip to TINT, or Boil to DYE

In 1927 a total of 19,517,213 pairs of boots, shoes and other footwear were made in Canada in the 170 factories in the Dominion.

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat everything that grows up people do." Such a course is almost certain to bring on indigestion and lay the foundation of much ill-health for the little one.

Other mothers administer harsh, nauseating purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months, and then only if approved by the doctor. For medicine, all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the new-born babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Feminine beauty is the rock upon which masculine intelligence is often wrecked.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Only one child out of every three in London obtains any education other than that given in the elementary schools.

Waiters on skates serve tea to skaters at some of the Swiss hotels.

Keep Minard's in the Medicine Chest.

ECZEMA PILES COLD-SORES RINGWORM & ULCERS

Quickly soothing and healing Zam-Buk is splendid for skin troubles of all kinds. It heals with the aid of Nature's herbs, in Nature's own way.

THE ART OF MAKING TEA What To Do and What Not To Do To Get the Best Results

Mr. Spalding Black, on the staff of the Salada Tea Company, recently prepared an interesting leaflet entitled "The Art Of Correct Tea Making." Approximately 20,000,000 cups of tea are consumed every day in Canada, and yet it is doubtful if one-tenth of that number is prepared with the necessary care to bring out the full flavor of the tea leaf so that this stimulating and refreshing drink may be thoroughly enjoyed. The following is from "The Art Of Correct Tea Making":

"Tea is one of the kindest blessings of Nature. In its comforting indulgence one can lose the worries of the day and forget the fatigue of effort."

"The full joy of a cup of this gracious beverage can only be reached when fine quality tea is used and ceremonial care exercised in its preparation to draw from each tiny leaf the essence of flavor and refreshment with which it has been endowed by effort."

"In the countries of the East, where the drinking of tea has been enjoyed for a thousand years or more, the subject of preparing the leaf for consumption has become a fine art and a ceremony, but the full delicious refreshment and healthful stimulation may be extracted from the fragrant tea-leave if the following rules are followed exactly:—

"Rule No. 1.—The best quality of tea must be used. The tea also must be fresh to yield the full goodness."

"Rule No. 2.—The quality of the water used will affect the flavor of the beverage in the cup. Draw fresh cold water and bring it to a hard 'bubbly' boil. Never use water that has been boiled before. Sometimes chlorine put in water to purify it will completely change the flavor of the tea. The water is to blame, however, and not the tea."

"Rule No. 3.—It is proper that only a crockery or china teapot be used, never one of metal or any other substance, if the pure and delicious flavor of the tea is to be drawn forth. Tea likewise should never be enclosed in a metal tea-ball."

"Rule No. 4.—The teapot must be scalded out with boiling water, and while it is warm place in it one level teaspoonful of tea for each cup required."

"Rule No. 5.—Now pour the boiling water on the leaves. Allow to steep in a warm place for five minutes. Stir just sufficiently to diffuse the full strength of the tea. Then pour the liquid off the leaves into another heated vessel, unless served immediately. If poured off in this way, the tea will not take on a bitter taste, which even the finest tea will be unless prevented from over-steeping. Taste according to these rules will be fragrant, delicious and completely satisfying."

Orren, a town in Sweden, is free from taxes due to the fact that the preceding generations planted trees which yield fruit enough to take care of taxes.

Aching Feet.

Bathe and rub well with Minard's. It soothes and brings a contented feeling of rest.

If some people only "spoke their minds" they'd be practically silent.

Minard's Liniment kills warts.

The unexpected happens about as often as the expected falls to.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Yours tell the pupils in my eyes play on the drums in my ears!

On fishing trips take Minard's.

Church fires are becoming rather common. Is there too much friction in our churches?

Treat Colds 2 Ways

With One Treatment RUBBED on throat and chest, Vicks

does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and (2) It stimulates the chest like an old-fashioned poultice and "draws out" the soreness.

VICKS VAPORUB
OVER 17 MILLION JARS USED YEARLY

HERCULES

PERMANENT BUILDING PAPER

MR. THINKER—

here's your health

Most of your clients are thinkers. A few facts regarding Hercules will impress them. Hercules—in three grades, x, xx, xxx—is tested and proven wind proof and damp proof. A little thought will show them that this is all a building paper should be.

And above all, by these very qualities, Hercules becomes the protection of the most precious treasures of the occupants of any home—their health.

A sample of Hercules is yours for the asking.

Appleford Paper Products
HAMILTON, CANADA

Annual Honey Production In Western Provinces Shown To Be Rapidly Increasing

That Canada is a wonderful country for beekeeping is now an undisputed fact, due chiefly to her wide range of flora and high average of favorable weather for the secretion and ingathering of nectar. Moreover, the greater part of the honey produced in Canada is of high quality, both in flavor and body and, being white in color, is most suitable for table use.

Until quite recently, beekeeping was practically confined to the older provinces in Eastern Canada, especially Ontario and Quebec, and in British Columbia; the surplus produced by them was absorbed by the Prairie Provinces. During the past five years, however, not only has beekeeping increased in the East but it has made a rapid advance in the Middle West, and because of this growth Canadian honey is now being exported to European markets where it is most favorably regarded. The total crop for Canada for 1925 was estimated at well over 10,000,000 pounds. Of this, Ontario produced 10,000,000 pounds; Quebec and Manitoba, each over 4,000,000 pounds; British Columbia, 638,819 pounds; and Saskatchewan, Alberta, and New Brunswick, each over 100,000 pounds. No record of actual production is available from Nova Scotia and Prince Edward Island, but from the total crop estimate given above it will be seen that the production from these provinces is relatively small. The surplus honey produced throughout the Dominion, of course, varies from year to year, according to weather conditions. For instance, 1925 was a favorable year in this respect for Eastern Canada, but not so good for the West, while 1926 was just the reverse, that is, good for the West and not so favorable for the East, as the following crop figures for 1926 will show: New Brunswick, 100,000 pounds; Ontario, 6,000,000 pounds; Manitoba, 5,252,515 pounds; Saskatchewan, 170,287 pounds; Alberta, 215,000 pounds; British Columbia, 898,257 pounds. The Quebec figures for 1926 are not yet available. In comparing 1926 figures with those of 1925, it will be seen that, with the exception of Manitoba, the honey crops of the western provinces were much larger in the former year. Reports of the 1927 crop so far received show that in western Canada the past season was even more favorable than 1926; Manitoba reports a crop of 7,388,575 pounds, British Columbia, 888,719 pounds, and Saskatchewan, 500,974 pounds. Crop reports from the other provinces for 1927 are not yet available.

While honey production is steadily increasing throughout the Dominion there are large areas yet unexploited; this is especially true of western provinces. The changing farming conditions in the more settled parts of the Prairie Provinces, the opening up of new territory, and the introduction of irrigation into semi-arid areas, are having an effect on beekeeping possibilities. For instance, the introduction of sweet clover into Manitoba and Saskatchewan is largely responsible for the increase in beekeeping in these two provinces. In the Peace River district where beekeeping is a comparatively new industry, an experimental apiary at Beaverlodge, Alberta, gave a wonderful crop during the summer of 1926. A colony on scales registered a gain of 20 pounds per 24 hours on more than one occasion and at the end of the season this colony gave 2815 pounds of surplus honey, and in addition gave one colony increase. Other pioneer apiaries reported equally good results. In the irrigated areas, where alfalfa and sweet clover are grown extensively, good crops of honey are assured. In British Columbia, the fertile valleys offer splendid opportunities for beekeeping, especially in the central part of the province. In Ontario and Quebec the older parts of the provinces are fairly well stocked with bees but the newer parts of the provinces offer what is practically an undeveloped field.

Herring flour is used quite extensively in Norway.

W. N. U. 1723

Farm Land Values Increase

Owing To Good Crops In Alberta Prices Advance Ten Per Cent.

Farm land values in Alberta have advanced in the past year by reason of the excellent crops produced. Since June 1927 it is estimated land values in the better districts have increased on an average by ten per cent, while in districts where crops have been exceptionally good and the number of new settlers large, the increase has amounted to 20 per cent. This is particularly true of the Peace River district where the value of good farms, reasonably close to transportation, has increased more than any part of the province.

For each farm in the province the average production during 1927 was \$4,385 according to the Provincial Minister of Agriculture. Against this he gives average production for some of the States of the Union for 1925: Montana, \$2,514; South Dakota, \$2,355; Iowa, \$2,262; Minnesota, \$1,971; Kansas, \$1,880. Average production per farm in Alberta in 1925 was \$3,154.

Makes Violin By Touch

Starting the work with a pen-knife and a file, Mr. Ernest Hall, a blind musician of Manchester, England, has made a violin in seven months, although he knows nothing whatever about the instrument. Mr. Hall has done all the work by finger touch. As plans are now to him he got a violin as a model.

Screenings Classified

Reclaimed Elevator Screenings the Most Important Grade

Screenings is a by-product of the grain industry and is not available commercially to Canadian stockmen. It consists of the broken and shrunken grains, weed seeds, including wild buckwheat and wild oats, chaff, etc., removed from the grain delivered to the terminal elevators and constitutes about 1 1/2 to 2 1/2 per cent. of the total grain received. This by-product is reclaimed and classified into reclaimed elevator screenings, oat screenings, and refuse screenings. A classification, which although still unofficial, is recognized by the Grain Inspection Department and complied with by most of the elevators. A new Dominion Department of Agriculture pamphlet on "Screenings As a Feed For Live Stock," gives the composition of the grades. By far the most important grade is the one named reclaimed elevator screenings. It contains about 50 to 70 per cent. of wild buckwheat, 20 to 40 per cent. of broken or shrunken whole grain, wild oats, and not over 3 per cent. of small weed seeds. When finely ground it has been proved by experiment to be a very valuable feed for growing and fattening pigs and for fattening steers. The second grade, oat screenings, contains about 75 per cent. of wild oats, 15 per cent. of domestic oats, a small percentage of barley and an occasional wheat kernel. It has a feeding value distinctly inferior to that of reclaimed elevator screenings. The third grade, refuse screenings, consists of small weed seeds, chaff and the dust and dirt accumulating from reclaiming. It has been found to be of little or no feeding value in the ration of swine. Besides these three grades, a fourth grade, called elevator screenings, is used. It includes any screenings not falling into the first three classifications, provided the required minimum percentage of wild buckwheat and wild oats are put into this class. The pamphlet which gives an account of the Experimental Farm's experiments to ascertain the feeding value of the different grades of screenings, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Farm Lands At Premium

Few Farms Are Available For Renters In Brandon District

Farm lands are almost impossible to rent around Brandon, according to real estate men, who state that lists of persons anxious to rent farm lands are held by many agents in the city, but there are no farm lands available. Where there is a chance of farms being for rent nearby farmers have availed themselves of the opportunity of acquiring more land. There is a most optimistic outlook here.

A divorce court is an institution which enables a man to be revamped.

The modern sheik is very often the living image of an unpaid tailor bill.

Ice Sculpture in Quebec

Just towards Carnival time in Quebec examples of ice sculpture begin to appear in the streets. This statutory ranges from very modest ice arches to most ambitious conceptions such as a railway locomotive, a dog team and sled or a carillon (habitant sleigh) complete with horse and "bon homme et bonne femme." These statues are not freakish bits or carnival decoration but embody very real artistic values and are usually set up before the Chateau Frontenac.

To Ensure Satisfactory Yields Careful Selection of Seed Wheat Is of the Utmost Importance

PLANNING TRIPS TO EUROPE

Personally Conducted Tour Has

An Interesting Itinerary

With winter on its last legs (why not be optimistic?) and summer vacations in the offing, Canadians are beginning to plan trips to Europe and the railways and steamship companies are making their preparations. Arrangements have been completed between the Canadian National Railways and the White Star line for the third annual personally conducted tour of Europe, which will commence on July 7, when the Laurentic sails from Montreal. A great many western Canadians, including school teachers, who are always good summer travellers, are already paying some attention to their bank accounts, and are making inquiries about the itinerary. It is an interesting one. After eight days on the ocean, the motor coach trip through-out England and Scotland will commence. The English Lakes, Carlisle, and some of the other historic spots close by will be visited on the first day; a trip through the Burns country will wind up at Glasgow, and there will be a day's sightseeing in Edinburgh after a journey through the Trossachs. From Edinburgh, the tourists will go to Newcastle, Durham, York and Leamington, thence to London by way of the Shakespeare country and Oxford. Four days in London will give the visitors ample opportunity to see the Tower of London, the Houses of Parliament and the other ancient landmarks of history. Windsor and Hampton will rouse up more memories, and Stokes Poles will bring to mind the curlew tolling the knell of parting day, the village Hampdens, mute inglorious Miltons and the usual reflections appertaining thereto. Bruges and Brussels will be followed by a week in Switzerland—Locarno, Menaggio, Interlaken, Montreux, Geneva, with boat trips—and the six days in Paris will likely be all too few. The tourists will sail from Havre on the Morganic, arriving in Montreal on August 18, 42 days after they left it. One of the most lavishing aspects of the tour, according to railway officials, is that it will not be rushed and that the travellers will have time to allow the multitude of new impressions to soak into their memories for future refreshment.

Testing Saskatchewan Clay

Clay from 22 different deposits in the western part of the province are under test in the Department of Ceramics, University of Saskatchewan, to determine their suitability for the manufacture of whiteware. This classification includes such products as household ware, electric porcelain and floor and wall tile.

If seed wheat contains abnormal or discolored kernels a first class crop cannot be grown to maturity even under ideal climatic conditions. Weather conditions, such as prevailed in the prairie provinces in Canada during the harvest time of 1927, tended to bring out these abnormalities and discolorations in grain to a marked extent than usual.

Shriveled, shrunken and pimpled or blistered wheat should be avoided. Shriveled or shrunken kernels may be the result of badly rusted wheat or may be indicative of the presence of a fungus within the seed, while frozen wheat has a pimpled or blistered seed coat. A mummified kernel which is white to gray in color is typical of the presence of a very serious and destructive fungus disease.

Discolorations such as green, pink and black are also very common. Green kernels denote lack of maturity, while the cause of the distinct pinkish discoloration so often found is not definitely known. Blackened kernels are typical of the presence of a number of different wheat parasites. If the tip of the germ end is ink black in color bacteria are very frequently the cause. If blackening is evident at different places on the seed coat, fungi, which cause root diseases of cereals, are often present.

During the last two years experiments have been conducted to study the importance of such abnormalities and discolorations as are mentioned above, and results signify that it is a very serious practice to sow wheat of this kind. In all cases germination is reduced and the plants which survive are very often weak and sickly in appearance; by sowing such wheat the farmer in many cases may introduce disease producing fungi into his land.

Wise and careful selection of seed wheat is of the utmost importance. Ordinary seed cleaning methods such as are used by the average farmer will suffice to remove badly shrunken and very light kernels, but many remain, and if these comprise even a small proportion of the seed lot it should be avoided. Doubtful samples of seed grain may be sent to any of the Dominion Experimental Farms or to this laboratory for examination.

Roots As Feed For Horses

Turnips Or Carrots Are Good For Horses During the Winter

Roots are a valuable feed for horses under many conditions. For instance, they are good for horses during moderate farm work during the winter. Two or three turnips or a few carrots thrown into the manger when the horse comes in at night will be greatly relished. Turnips or carrots are more acceptable to horses than mangels, and they should be given whole. According to a new bulletin of the Dominion Department of Agriculture on "Growing and Feeding Field Roots," the merits of roots as a feed for horses may be summed up as follows: They increase palatability, increase the digestibility of coarse fodders, benefit the teeth and gums, form a splendid tonic, and cheapen the ration.

British Columbia Lead-Producer

Approximately 94 per cent. of Canada's output of lead and 82 per cent. of zinc comes from British Columbia; the remaining 6 per cent. of the lead originating in Ontario, the Yukon, and Quebec, and about 8 per cent. of the zinc in Quebec.

"Waiter, there is a caterpillar on this plate."

"No. That is the sausage you ordered."—Buen Humor, Madrid.

How The Sun Life Made Thirty-Eight Millions Profit in The Year 1927

Participating Policyholders Receive Ninety-Five Per Cent.
of Profits—Dividends to Policyholders Again Increased
—Company Seeks Legislation to Maintain Canadian
Control.

Montreal, March 10.—The phenomenal record of the Sun Life Assurance Company is an inspiration to all Canadians. Its income of \$100,000,000 is already equal to the total revenue of the Government of Canada in the year 1910, and \$38,000,000 is certainly an amazing sum to have earned as profit in one year. Not many corporations anywhere can report such figures. The President's intimate, practical comments at the annual meeting explaining how these huge profits were made were illuminating.

Of even greater moment, however, were his statements regarding the danger that this great Canadian institution may pass from Canadian control. Some months ago Mr. Macaulay referred to the activity of Wall Street in the buying of Sun Life stock, and cautioned policyholders and shareholders of the menace it involved to an institution, which was founded and developed by Canadians and which has obtained its phenomenal growth under Canadian management. Subsequent events have justified these misgivings, and at the meeting today the first public intimation was given that the Sun Life directors are seeking legislation at the present session of Parliament which is intended to effectively forestall this danger.

Precautions to Maintain the Company Canadian in Character.

In concluding his address to the shareholders and policyholders the President made the following reference to the matter:

"There is but one cloud on our horizon. Our very prosperity has created a remarkable demand for our capital stock. We desire to ensure that this great company shall always remain strictly Canadian in its control and in particular that its investments shall never come under Wall Street domination. A bill which we have introduced into Parliament will be submitted for your approval. If it is passed, it will give us the protection we so much need and know we can rely on the whole-hearted sympathy and support, not only of our stockholders and policyholders here present, but of our army of policyholders throughout the country."

The meeting unanimously approved of the measure in question. How important and how vital to Canadians are the interests at stake is disclosed in the report submitted to the annual meeting of the Company.

In moving the adoption of the report, President Macaulay said:—
"You gentlemen have become so accustomed to our presenting every year a statement surpassing all previous records that you come prepared to hear another report of this description. I am quite sure, however, that not one of you in his most optimistic mood, expected a report so favourable as that which you now have. Our record for 1927 is indeed a remarkable one. Let me touch on the main features."

Remarkable Growth, Strength and Profits

"The new assurance completed amounted to \$328,000,000, an increase of over \$26,500,000. The amount in force at the close of the year had risen to \$1,487,000,000, and at the present moment is well over \$1,600,000,000. The income exceeded \$102,000,000, an increase over the previous year of \$28,000,000. This record is very impressive. Not only has this firm passed the one hundred million mark, but the increase alone is equal to what was our total income but eight years ago, which had been accumulated by forty-nine years of strenuous effort. A life company with a total income no greater than our increase would be an important corporation."

"The assets have increased by \$28,000,000, and now exceed \$400,000,000. But the most wonderful of all these wonderful figures is the amount earned as profit—\$38,000,000. How great this figure is may be judged from the fact that the earnings of the previous year, in which we so rejoiced, were \$20,500,000. It would be hardly reasonable to assume that our earnings of future years will continue on such a high level, but we have therefore not made a large part of this sum to provide for future contingencies."

Does Ill Health Detract from Your Good Looks?

Hamilton, Ont.—"I was in a rundown state of health, my nerves were bad and I suffered from back aches and pains in my side, which would be severe, and I would get weak and have to lie down. I could not eat with-out being distressed. Upon the advice of a friend I started to take Dr. Pierce's Kidney and Bladder Pills. I have now a good appetite and my nerves are in splendid condition. I am strong and healthy in every way."—Mrs. George Turanaky, 373 Ferguson Ave. North.

Sold by druggists. Fluid and tablets. Send 10c for trial box of tablets to Dr. Pierce's Laboratory, Bridgeport, Ont.

LESSON No. 18

Question: Why is emulsified cod-liver oil so needful for a child who is pale and losing weight?

Answer: It is food and tonic rich in vitamins and other nourishing factors that are particularly helpful to a weakened child.

For your child—old reliable

SCOTT'S EMULSION

receipts and our record is illuminating. In 1921 the average rate earned by us was 5.07 per cent; in 1922 it was 6.20 per cent; in 1924, 6.38 per cent; in 1925, 6.41 per cent; in 1926, 6.69 per cent; and in 1927, if we were to use the same basis of calculation as in previous years, the rate would be 6.81 per cent. We, however, do not wish to show such a high rate, and as we always make a charge of 5 per cent on the present sum of our investments, we must allow for that. The quality of our securities may be judged by the fact that not one of our investments is under \$100,000, and we have not a single investment in any bond, preferred or common stock listed in our assets is in arrears for even one cent.

"The quality of our securities may be judged by the fact that not one of our investments is under \$100,000, and we have not a single investment in any bond, preferred or common stock listed in our assets is in arrears for even one cent."

Business Doubled in Four Years

"The position we have attained justifies enthusiasm, but we must always look on the present as a mere vantage ground from which to plan for the future. What is that future to be? Year after year we have been confidently predicting the glorious future yet to come, and that promised future is now unfolding itself before our eyes. It is a picture of greatness and strength. But what of today's future? I have just been reading my own report of two years ago, and already the figures of which we were then so proud look small and outgrown. We have doubled in size now every five and a half years since the Company began, but our last doubling has taken only four years, and we are doubling growing more rapidly than ever before in our history. I predict that the figures of two years hence will make even the figures of today look small and outgrown in their turn."

Sun Life Sets Its Own Pace

"People sometimes say when speaking of our progress: 'Yes, life assurance is growing wonderfully.' Our business is growing so rapidly that it is not content to grow only at the rate of life assurance generally. Statistics now available indicate that in 1927 the aggregate new business of all the companies operating in the United States over the total for 1926 was only one per cent. And in Canada by seven per cent. But the new business of the Sun Life of Canada was an increase of twenty-three per cent. We set our own pace. Our prosperity and popularity, and the confidence of our policyholders, makes our growth both rapid and certain. The future still before us, well, I am convinced, is more wonderful than anything we can now imagine. And it is indeed a happy thought that all that growth in size and all that growth in prosperity mean increased service to humanity, and service at steadily lowering cost to our policyholders."

"The President closed his remarks by his tribute to the need of safeguarding the future of the Company, as above quoted."

The Board of Directors of the Sun Life of Canada.

HEART WAS SO WEAK Had to Stay in Bed

Mrs. F. Wilson, Leithridge, Alta., writes: "My heart was very weak and I had to stay in bed for six weeks with it."

"My aunt advised me to take

MILBURN'S NERVE PILLS

as she had taken them with good results after a very bad operation."

"I took them and some time after a doctor came to examine me for life insurance. He said my heart was nothing wrong with my heart."

Milburn's Heart and Nerve Pills are 50c a box at all druggists and dealers, and will be mailed free when the box is sent by The T. Milburn Co., Limited, Toronto, Ont.

Life is composed of the following:—
T. B. Macaulay, F.I.A., P.A.S., President and Managing Director; Arthur Wood, F.I.A., P.A.S., Vice-President and Actuary; Robert Adair, W. M. Birks, Hon. Raoul Dandurand, J. Redpath Douglas, Sir Herbert S. Holt, Abner Kingsman, J. N. McDonald, C. R. Nell, Carl Riordon, John W. Ross, His Honor James C. Tory, Hon. Lorne C. Webster. Three new directors were added at the meeting:—Hon. L. A. Taschereau, Ross H. McMaster and C. B. McNaught.

SUNDAY SCHOOL LESSON

MARCH 11

JESUS FEEDS THE MULTITUDES

Golden Text: "I am the bread of life; he that cometh to Me shall not hunger, and he that believeth on Me shall never thirst."—John 6:35.

Lesson: Mark 6:31-41; 8:1-10.
Devotional Reading: Ezekiel 31, 11-16.

Explanations and Comments

I. The Need For Rest, verses 31, 32.—The disciples returned from their meal, fatigued with work, and were lost. Master's neglect nor communion was possible, however, so great was the crowd that Jesus, they had no leisure even to eat, Mark tells us. "Come ye yourselves apart into a desert place and rest a while," Jesus said. Accordingly, they set off in their boat with him for an uninhabited spot (for this is the meaning here of the word desert), on the other side of the lake.

They were alone, and Jesus, the regular program: It is only the temporary expediency. Worn bodies were being healed, and we were given chance to recover if they are to be effective service. He makes us to lie down in green pastures; he restores our souls. Dr. Jowles, recalls how Ruskin after a time spent in some great art gallery found that his eyes were irritated and confused by changing colors and the accuracy and sanity of his artistic discernment were lost. To correct all this he carried in his pocket a tablet of neutral blue, the restful color of the sea, and gazed upon it until his bewilderment passed away and the keenness of his perception was restored in a certain way.

When the rush of life is so fierce, when everything is so intense, when the meeting interests are so manifold, and often so glaring and bewildering, it is imperative that we get apart to correct our moral and spiritual vision. The strain impairs our powers, and they need the rest of the neutral tints."

RICH, RED BLOOD A REAL NERVE TONIC

The Source Of All Nervousness Is Weak, Watery Blood

Many people, both men and women, find themselves run down through nervousness, anxiety, such as are found themselves tired, low-spirited and depressed. Their nerves seem to be worn out after they suffer from headaches and other nerve pains. All this comes from starved nerves.

Impurifying the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves; improves the appetite, gives new strength and spirits and makes the entire dependent people bright and cheerful. Miss Irene Denne, Rt. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—

"I suffered for a long time with my nerves and a general run-down condition. I got so weak that I could not get out of bed a part of every day. I could not do any work and was taking medicine after medicine. I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and, in fact, it restored me to the blessing of good health. When I think of the marvelous good these pills have done for me, I can most highly recommend them to all who are so weak, as you people."

If you are at all run-down, or take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Few people realize that their neighbors could be worse.

Holloway's Liniment—Valuable in the Stable.

Countless tests and experiments, covering a period of over thirty years, prove that aluminum is the only completely satisfactory material in which to pack tea. Red Rose tea is put up only in aluminum, and a "money-back" guarantee goes with every package. 2W

BRITAIN TO CANADA

BE AN AUCTIONEER. Earn from \$25 to \$100 per day. Send for large list of names of auctioneers. How to become one. Part's Auction School and Business College. Box 119, Des Moines, Iowa.

The first public operatic performance is believed to have been staged 327 years ago at a French royal wedding.

Nearly all children are subject to worms—and many are born with them. Spare them suffering by using Mother Gray's Worm Expeller, an excellent remedy.

In the mines of Butte, Montana, the earth temperature has been reduced to as low as 10 to 20 degrees by proper ventilation.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely at first sign of colic; or constipation; or diarrhea. Or those many times when your just do not know what is the matter. For real sickness, call the doctor. Always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be free from dangerous drugs, but why experiment? Besides, the look on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for

Fletcher's CASTORIA

UNITED FARMERS STRESS VALUE OF THE H. B. ROAD

Saskatoon.—Initial steps leading toward the creation of a co-operative wholesale society in this province were taken by delegates attending the annual convention of the United Farmers of Canada, Saskatchewan section.

Following a debate, a resolution was adopted calling for the urgent need of separation of the present trading department from the parent body. The board of directors also was authorized to appoint three representatives of the association as members of a provisional board which will be entrusted with the task of formulating the details of the proposed plan of organization.

As a fitting commemoration of the Diamond Jubilee of Confederation, the organized farmers of Saskatchewan advocated the establishment of a free consultative clinic in the province, the report revealed.

The main object of the clinic would be to bring in the best medical skill within the reach of all, and provide complete laboratory investigation of a case and X-ray service.

In commenting on this subject the report says:

"We believe that a free consultative clinic would enable people to have medical examination in the incipient stage of illness and would be of inestimable value in preventing disease.

"On the question of transportation, the directors voted gratification in the reduction of rates on grain and flour during the past year. The rate on grain, on what is commonly known as the Armstrong route, has been lowered 10 cents a bushel, giving the farmer a reasonable all rail rate to the Atlantic ports."

The lowering of this rate, the report states, will also prove a decided check on lake transportation charges. Equalization of the rates North and South, governed by the Crows Nest agreement, had also meant a saving of \$2,000,000 a year to the farmers of Northern Alberta and Saskatchewan.

The report concludes: "We are now seeing rushed to completion the long hoped for Hudson's Bay Railway. Organized efforts of the Saskatchewan farmers have been largely responsible for the initiative of the federal government in undertaking the completion of this route."

"It is impossible to estimate the value to Western agriculture to be derived from the opening of our own seaport, thereby placing us 1,100 miles nearer our consuming markets; but if we are to enjoy the full benefits of this outlet organized watchfulness must be our motto where the Hudson's Bay Railway is concerned."

RESTORED TO GOOD HEALTH

Mother of Eleven Children
Praises Lydia E. Pinkham's
Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramothville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—DAME WILLIAM PARET, Box 414, Buckingham, Quebec.

Why suffer for years with back ache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, 256,900 replies were received, and 98 out of every 100 reported they were benefited by its use.

W. N. U. 1723

Trade Barometer Rising

Trade and Manufacturing Reported On a High Level
Ottawa.—Canadian business got off to a good start for the current year. Out of the nine indicators of conditions for the first month of the year which are reported by the Dominion Bureau of Statistics eight showed Canadian trade and manufacturing were on a higher level than they were at the opening of 1927.

In the table which follows the state of the index for the corresponding month last year is taken as 100 and the latest index for the present year is given as a percentage on that basis. The results are:

Employment, 106.
Pig iron, 125.
Steel, 142.
Bank debits, 150.
Bank clearings, 128.
Car-loadings, 108.
Imports, 101.
Exports, 98.

The employment figure is that reported to the bureau for the first of February. Car-loadings are for the mid-week of February. All the other figures reflect conditions during January.

Think Banking System Could Be Improved

Parliamentary Committee Is Preparing To Start Work

Ottawa.—A decision to call the Deputy Minister of Finance as the first witness was reached at the meeting of the parliamentary committee on banking and commerce. The committee has before it a resolution moved by J. S. Woodworth, Labor, Winnipeg North Centre, that the time has come for the consideration of the improvement of our banking system and that the banking and commerce committees be instructed to study possible improvements and report thereon.

On motion of L. J. Ladner, Conservative, Vancouver South, the committee decided to request the House to give it authority to have the proceedings reported and printed.

It was suggested that one or two witnesses from the United States who were familiar with the operation of the Federal Reserve Bank would be sufficient from that country. The recommendation of witnesses was then left to the sub-committee.

Appoint Royal Commission

Will Investigate Finding Of Ballots On Street In Ottawa

Toronto.—An investigation to clear up the finding of 19 ballots on the street in Ottawa will be made by a royal commission composed of Mr. Justice Mages and Mr. Justice Hodgins of the appellate court division. Premier Ferguson announced in the legislature. The premier's decision put an end to a deadlock which developed in the privileges and elections committee when that body asked Premier Slinn to produce the ballots then in his possession and he refused until the ballot boxes were examined. The ballots are presumed to be identical with those used in the last Ottawa South election.

Health Insurance Plan

Victoria.—Establishment of a provincial health insurance plan, designed particularly to extend maternity aid to settlers in districts distant from municipal centres, was given approval by the agriculture committee and the House will be advised to support appointment of a special committee to inquire into the problem.

Another Medal For Lindbergh

New York.—Another medal was awarded to Colonel Charles A. Lindbergh. Trustees of the Woodrow Wilson Foundation voted unanimously to give the flier the Woodrow Wilson award, which will consist of the Woodrow Wilson medal and \$25,000, in recognition of his trans-Atlantic and Central American flights.

Cost Of Tariff Board

Ottawa.—The cost of the advisory board on tariff and taxation was given in a return tabled in the House today. In salaries and allowances the board cost \$48,512 was expended between April, 1926, and January 31, 1928. The staff of 14 received in salaries during the same period \$20,130.

Reforms For India

Sir John Simon, head of the British statutory commission on Indian Reforms which has been under fire in the Indian Legislature.

Gasoline Prices Drop

Reduction Of Three To Five Cents A Gallon In Manitoba

Winnipeg, Man.—Gasoline prices in Winnipeg and most parts of Manitoba have dropped from three to five cents. Tank wagon prices are now quoted at 21 cents for low test gasoline and 24 cents for high test. The service station prices have dropped to 25 cents for the low test and 31 for the high, inclusive of the government tax.

The new prices were initiated by the British American Oil Company, the Prairie Oil Company and the Imperial Oil Company. The average reduction throughout the province amounts to three cents, while at some places a drop of five cents has been reported. Members of the trade give the opinion that the price drop will have an early repercussion in Southern Saskatchewan.

Ban On Submarines

British Government Readmits Position On This Question

London.—First Lord of the Admiralty, when asked in the House of Commons if he had considered the desirability of abolishing the submarine in all other countries do the same, replied that the attitude of the British Government remained the same as enunciated by Lord Lee, of Fareham, at the Washington conference in 1921. At that time Lord Lee urged abolition of submarine warfare.

This attitude, the First Lord added, was reaffirmed by himself at a plenary session of the recent naval conference at Geneva.

Former Slave Dies At Advanced Age

Aylmer, Ont.—Lloyd Graves, former slave, died recently at Mt. Elgin at the age of 104. He was born in Kentucky, February 22, 1824.

CANNYN MARGARET

This is Margaret Marshall, six and a half years old, photographed on the steps of the Canadian National train which carried her from Drumheller, Alberta, to the seaboard. All by herself, little Margaret is making a trip to see her auntie at Greenock, Scotland. Before she left home her mother said to her, "Now don't get off the train, Margaret, and don't get any candy, little Scot, obeyed her, and not only that, but she consistently mistrusts all strangers except the train crew, which was so good to her on her long journey."

Predicts B.C. Will Use Coal Resources

Cranbrook Member Believes Oil and Gasoline Will Be Manufactured In Province

Victoria, B.C.—British Columbia will some day manufacture all its oil and gasoline from its vast coal resources, in the opinion of N. W. Wallinger, Cranbrook member of the Legislature and a veteran mining man.

"We should follow up the use of pulverized coal as a fuel and the use of coal for gasoline and fuel oil," said Mr. Wallinger. "Experiments already made indicate that the idea is not a dream but a practical opportunity to utilize natural resources at present hardly realized. British Columbia, self-contained in the matter of oil and gasoline, would become one of the richest industrial zones in the world."

Mr. Wallinger deprecates the fact that few great mines have been discovered in British Columbia during the past 50 years. "The prospector is not encouraged as he used to be. Most of the prospectors I run across these days are 60 years old, or older."

Walked Narrow Ledge Across Niagara Gorge

Woman Takes Dangerous Path To Enter U.S. Illegally

Niagara Falls, N.Y.—How she flirted with death to enter this country illegally from Canada was told by Anna Putrinska, a pretty dressmaker of Montreal. She is a native of Lithuania.

She claimed she was lowered by a rope over the gorge bank on the Canadian side to the lower abutments of the Michigan Central Railway Bridge and then, accompanied by an alien runner, made her way across the gorge on the narrow steel ledge forming part of the under section of the bridge, more than 250 feet above the swirling whirlpool rapids.

The girl and her escort landed safely on the American shore and she was taken to the home of Frank Desgrosiere here to await four other women who were brought across the river in a rowboat the following night.

All five of the women were held as witnesses against the five men charged with smuggling aliens.

Death Of R. E. A. Leach

Regina, Sask.—R. E. A. Leach, 68, chairman of the Saskatchewan liquor commission from 1920 until the inception of government liquor control in 1925, collapsed and died suddenly at his home here. Heart failure was believed to have been the cause of death. Besides his widow, daughter and son, Mr. Leach is survived by three brothers, Hillyard Leach, K.C., Winnipeg; Ald. E. T. Leach, Winnipeg; Dr. G. W. Leach, Raymond, Alta., and a sister, Mrs. F. J. Oaten, Los Angeles.

U. S. STRONG FOR THE ABOLITION OF ALL WARS

Washington, D.C.—An invitation to Great Britain, France, Italy, Germany and Japan to join the United States in forming a league to outlaw war outside the League of Nations was contained in the note handed by Secretary of State Kellogg, to the French ambassador, Paul Claudel, for transmission to the French Government.

The United States firmly puts aside French suggestions that the proposed agreement recognizes the right to make war under certain conditions. "If such a declaration were accompanied by definitions of the word 'aggressor,'" and by exceptions, and qualifications stipulating what nations would be justified in going to war, its effect would be very greatly weakened and its positive value as a guaranty of peace virtually destroyed," says the United States note.

The note indicates that the United States is not unwilling to conclude a separate agreement with France on the subject, but wants Great Britain and other great powers to participate. "If the members of the League of Nations cannot without violating the terms of the covenant of the league, agree among themselves and with the government of the United States to renounce war as an instrument of their national policy, it seems useless to discuss either bilateral or multilateral treaties unreservedly renouncing war. I am reluctant to believe, however, that the provisions of the covenant of the League of Nations really stands in the way of co-operation of members of the league and the United States in a common effort to abolish war."

The note, which is brief, concludes: "The government of the United States desires to see the institution of war abolished and stands ready to confederate with the French, British, Italian, German and Japanese governments a single multilateral treaty, open to subsequent adherence by any and all other governments, binding parties thereto not to resort to war with one another. The precise language to be employed in such a treaty is a matter of indifference to the United States so long as it clearly and unmistakably sets forth the determination of the parties to abolish war among themselves. I therefore renew the suggestion contained in my note of January 11, 1925, that the government of France join with the government of the United States in transmitting to British, Italian, German and Japanese governments for their consideration and comment, the text of Mr. Briand's original proposal, together with copies of subsequent correspondence between France and the United States, as a basis for preliminary discussions looking to conclusion of an appropriate multilateral treaty proscribing recourse to war."

Oldest Motor Car For Sale

French Model Of 1891 Still In Working Order

Paris.—The oldest motor car in the world, built nearly forty years ago and still in working order after having covered close on 200,000 miles, is up for sale by auction. It is a one-horse power Panhard with a chain drive and iron tires. It made its first run in 1891, and the engine was taken down and completely overhauled in 1912. That is the only occasion on which it has been to the garage. The owner of the car is in Abbe Gavois, the worthy village priest of Bello-Saint-Leonard, in the Somme department, who bought it in 1895 for the sum of \$365 and has used it ever since. Several times he has exhibited it in Paris at the Motor Salon, during it down the Champs Elysees amid the stream of traffic of modern luxury cars.

Abbe Gavois wants to build a new church in his village in the old war area dedicated to St. Christopher, the patron saint of motorists, and he has decided the "old bus" to the Automobile Club of Picardy for sale to the highest bidder, the product of the sale to be used towards the building of the new church.

MAINTAIN THE QUALITY OF ALBERTA'S CROPS.

Better Seed
means

Better Yields - Better Grades - Better Prices.

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province, is urging the use this spring by farmers throughout the province of

High Quality, Clean, Treated Seed Grain,
in order to reduce the heavy annual losses sustained by sowing inferior seed.

- Farmers can co-operate by
1. Using registered seed wherever available.
 2. Using at least high quality commercial seed.
 3. Having seed tested for germination and purity.
 4. Treating seed for smut.
 5. Thoroughly cleaning all grain intended for seed.
 6. Seeding only varieties of recognized quality and varieties suitable to the district.
- 'Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U.F.A. Locals, Boards of Trade, The Wheat Pool, Banks, Commercial Grain Firms, The Press, and many other organizations are working in co-operation with a

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers' Association, the Alberta Seed Growers' Association, the C.P.R. Agricultural Department, and the University of Alberta.

D. A. McConnel, Provincial Publicity Commissioner, Edmonton, Secretary.

Send Coupons In.

Wheat Pool members should
arrange to send their delivery
check and coupons to the
head office of the Wheat Pool,
Calgary, at once. These coupons
must be in the office before
a second payment can be
made. We strongly urge mem-
bers to see that their coupons
are sent in.

Wolf and Coyote Bounties.

Following are the bounties
to be paid on wolves killed in
the province:

\$20 will be paid for female
timber wolves, while male
timber wolf pelts will com-
mand \$10.

Adult prairie wolves taken
between April 30 and Sept. 1
will be paid for at \$2 a pelt.
Each wolf pup taken be-
fore July 1 will command \$2.

While prairie wolf and wolf
pup pelts upon payment of
the bounty become the prop-
erty of the Provincial Gov-
ernment, timber wolf pelts
upon which bounty is paid
are to be sold thru the Gov-
ernment's fur market service
and the proceeds less the sell-
ing commission, will be paid
to the person receiving the
bounty.

Threshers Must Send Returns

Progress is being made in
compiling the total yield of
various grain crops raised in
Alberta from returns sent in
by threshermen. Threshermen
are asked to send in their
reports on their operations
completed last fall. Thresh-
ermen who secured a 1927 li-
cense will be able to complete
any necessary threshing this
spring under this registration,
securing a new license, as
usual, before beginning op-
erations on the 1928 crop.

PROF. M. S. CROSSE

448 Logan Ave. Winnipeg, Man.

Here and There

(20) Invited to see Montreal by the
hotels and the tourist and conven-
tion bureau of the city, 75 mem-
bers of the Massachusetts Hotel As-
sociation spent a week-end re-
cently there and were given a royal
reception. As their president, Emil
Cousin, said, "We came to see New
England to Montreal, but you have
lost Montreal and Quebec province
to us."

During the usually quiet immi-
gration months of December and
January the Canadian Colonization
Association colonized 76 families
who took up land to the extent of
22,734 acres. In 1927 the Canadian
Pacific Railway, through its land
department and its subsidiary (the
C. C. A.) placed 2,094 families on
Canadian farms, this including 625
families averaging 5 persons to the
credit of the Association and 1,629
families on C. P. R. lands.

The movement of British youth
to Canada promises to be consid-
erably heavier than usual, due to new
arrangements made with the Brit-
ish Government. Ontario is taking
600 boys, Manitoba 50 and the Mar-
time Provinces and Saskatchewan
an indeterminate number, while
some hundreds are to be moved by
private organizations. In all it is
estimated some 2,500 boys will prob-
ably be brought out under the new
scheme this summer.

Another body of sportsmen are
finding Montreal and Eastern Can-
ada "good places" in winter as
well as summer. The Appalachian
Mountain Club, of Boston, picked
the best period of the winter season
to spend a week in the Laurentians
mainly devoted to skiing, but
with sleighing, dog-mushing and
tobogganing included. It was the
first time they had ever visited this
district in winter and they are go-
ing to repeat it.

Resignation of Colonel Walter
Maughan as Canadian Pacific
Steamship Passenger Traffic Man-
ager has been followed by the ap-
pointment of William Baird, who
was assistant European Manager
of the Canadian Pacific Railway in
London, Eng. Mr. Baird, whose
appointment is effective March 1,
joined the Allan Line steamship
company at Glasgow as senior
clerk in 1905 and came into C. P.
service when that company took
over the Allan Line in 1915.

Bee keeping in Saskatchewan
made marked progress in 1927, there
being an increase of 45 per cent in
the number of colonies over those
of 1926 and an increase of 191 per
cent in the 1927 honey crop over
that of the previous year. The num-
ber of spring colonies in 1927 was
5,803 which increased to 5,982 by
the fall count. The production of
comb honey for the year was 64,842
pounds and of extracted honey 436-
932 pounds, making an average pro-
duction per colony of 148 1/2 pounds.

Airplanes are now being used to
herd vast numbers of reindeer in
the big Arctic stock farms, accord-
ing to Ralph Lomen, pioneer of the
reindeer industry of Alaska. "It's
a new idea and it's not being prac-
ticed regularly, but herding by air-
planes seems feasible," said Mr.
Lomen. "Our head herdsman went
out recently and in two hours ac-
complished as much as would other-
wise have required a week with six
men. There is room for 12,000,000
reindeer in the northern tundra of
Canada and such a herd would be
worth \$50,000,000. It could be done
in 50 years if Canada started now
in a modest way."

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued.

It was strange for Arthur Warner, after all his lonely years, to be sitting here talking so intimately to a woman who was a comparative stranger, and receiving from her confidences which she had given to no one else. He thought of his own lonely house—so precious to him, so eagerly acquired, so patiently worked for—how a woman like this would have brightened it and graced it with her presence. She was so calm, so brave, so gentle.

When their eyes met Helmi smiled encouragingly at him, though sadly too, as if the tears were not very far away. Were they tears because, he was going?

"Helmi," he said, "we are both facing the elemental things of life, and it draws us together. We are facing the hardest things that men and women ever have to face. Your part will be to give life, maybe at the expense of your own. Mine is—God forgive me—to take life. Are you afraid?"

Helmi shook her head. "No," she said, simply, "I believe in God—I believe He loves me. I love Him. Every day I say my good words. I learned them in His house. They are, 'Christ be true; Seek truth; Know God; Serve others.' Then I say, 'Please God, bring home my Jack.' It is good to pray, Mr. English, when one is afraid."

The first ragged whistle of the train came booming down the valley. "Tell me your name Helmi," he said, "I want to say good words for you and for your Jack."

Helmi took his hand and impulsively kissed it. "Helmi, Doran," she said, "I am glad you will say good words for my Jack. Maybe you will see him over there—I know he will go."

"I hope for your sake that it will all be over when Jack comes home at Christmas."

He was standing up now with his cap in his hand. The train was whistling again as it came slowly down the grade. Helmi looked at him reverently. It was not merely a lonely, weather-beaten homesteader she was standing before her; she saw a brave man who was willing to give everything he possessed, not withholding his own life, for the cause of human liberty, and on his face she saw the unmistakable majesty which comes to those who are appointed to die. Arthur Warner bent over and kissed her shining hair. "Good-bye, dear Helmi," he said.

Demonstrates New Camera

Spark Instead Of Shutter Gives More Exposures Per Second

Moving pictures taken at the rate of 20,000 exposures a second showing a bullet apparently barely moving as it shattered a glass bulb were shown to a meeting of the Optical Society of America.

Professor Alexander Klemin, of New York University, who gave the demonstration at Columbia University, said the camera used was similar to an ordinary one except that a spark vibrating with high frequency took the place of a shutter.

Pictures of a whirling aeroplane propeller, taken at the rate of only 2,100 a second, showed the blades turning at a rate not much faster than a slowly revolving door.

The pictures of the bullet shattering the glass bulb taken at the high frequency exposures showed the shattered glass fragments falling through air so slowly as to be hardly perceptible.

size or perfume, yet even Mrs. McMann admitted they were very nice flowers as flowers go in Canada. Helmi did not mind what Mrs. McMann said. She and the mountains knew they were wonderful flowers. The mountains had looked down upon her so kindly all summer, she knew they were pleased.

There was no dearth of praise among the men, who were glad to have fresh instead of canned vegetables for their meals, and twenty-four dollars was the sum Helmi had in the pocket of her black valise to prove that her garden had been a success. Even after the vegetables were done the asters and stocks flared and bloomed, and Helmi hoped that by some chance Jack would come in time to see too. They seemed to grow more showy and brilliant as the night frost drew nearer and nearer. But one night, while she slept, the frost slipped down the mountain, without a sound, and laid low every stalk and every bloom in her garden, and having done its work went back the way it came. The morning sky was blue and bright, the sun was warm, and playful little breezes turned the dead flowers over, just to be sure, that none were missed. When Helmi came out and saw the work of the night she wrung her hand—but only for a minute. That day she raked the dead stalks into a pile, and she burned them when they were dry and dug the garden for her next year's planting.

Helmi had not yet brought herself to ask for the two hundred dollars Jack had left. She wished the timekeeper would give it to her without asking for it, but the days wore on and she knew she must go soon. She would not let Mrs. McMann or anyone think she was grieving or distressed. Jack had told her that the greatest thing in married life was to trust and not be afraid, so she affected a gaiety she did not feel, which quite deceived the "elite" lady.

"These foreigners haven't got any fine feelings," Mrs. McMann told her friend Mrs. Turner. "Now one would think Helmi would feel a little shy, but pass her house any time you like and you can hear her singing, and as long as the days were nice she was either working in the garden or sitting outside sewing. And mind you, she went into the store and asked for white flannel from Jim Dawson—Mrs. Dawson told me. Well, of course, one can't expect much from these foreigners, their standards have never been like ours. Mr. McMann often told me I was too shy, but it was the proud Weekes way."

Helmi waited until the middle of the month. Still no letter, no word. There was no use going to the post-office. The same answer was inevitable—"Nothing today." She could hear it all the time, beating, beating on a sore spot in her heart. But always she had been able to smile and say something, words she had prepared on the way down.

One day she went to the sturdy little mine office and spoke to the timekeeper about the wages Jack had not taken. The timekeeper sat in his shirt-sleeves making out his accounts. The place reeked of stale tobacco, and dust lay gray on the windowsill. Quite frankly Helmi explained her reason for going to the city.

The timekeeper looked confused and embarrassed. "I'm awful sorry, Helmi," he said, "but it looks as if there has been a mistake here some place. There was two hundred dollars owing to Jack when he left, but a man came one day with an order from Jack and I gave him the money. He said when Jack got to Peace River he found there were some things he needed. It was about a week after Jack left, if I remember—I have the order here, if you would like to see it. You see, I didn't know you would be wanting it, or anything, or I would have refused this fellow, but he told me and I couldn't very well do anything but pay the money over."

(To Be Continued.)

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's "Asthma Remedy" has brought many to completely restored health and happiness. It is known and praised in every section of this broad land.

Too many persons mistake notably for fume.

Peace, Perfect Peace

Extract From a Letter Sent By a Soldier To His Wife

The following preciously preserved extract from a love letter written home to his wife by a soldier on active service will evoke tender memories in thousands of our former service men:

"Don't send me no more nagging letters, Lottie. They don't do no good. I'm three thousand miles away from home, and I want to enjoy this war in peace."

A fugue is a musical composition on one or more short themes which are reintroduced from time to time.

All speed limits were exceeded in that minute rush for motor licenses.

Demand

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it isn't! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

**Physicians prescribe Aspirin;
it does NOT affect the heart**

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin causes danger when taken against influenza, the Tablets will be stamped with their "Bayer Cross" trademark.

Cuticura Treatment For Dandruff

Part the hair and gently rub in Cuticura Ointment until the whole scalp has been treated. Let the Ointment remain on for some time, over night if convenient. Then shampoo with a soda of Cuticura Soap and warm water. (Do not rub Soap on the face.) Rinse thoroughly. A light application of Cuticura Ointment to the scalp between shampoos is often beneficial.

Sample Size Free by Mail. Address: Canadian Distributors, Toronto, Ont. Montreal 22, Que. 22, Kingston 22, Vancouver 22, Victoria 22.

FIRST-CLASS ACCOMMODATION FOR TRAVELERS' EUROPEAN PLAN.

RESTAURANT IN CONNECTION.

Through Canada's Inland Ocean

1. The Great Lakes Steamer S.S. Anishnabe, of the C.P. Fleet which carries its passenger through the land of cheese.
2. Serving a little booz during the trip. 3. The passengers' companions and well-wishers of a bon-voyage.

The Great Lakes for a summer holiday have no equal. Contrary to the generally prevailing opinion that the automobile and touring and camping are a greater attraction, these large bodies of fresh water, really inland seas, are holding their own, indeed, by those who know it is said that they are doing more.

From Port McNicoll to the Head voyage. The great white steamers of the Canadian Pacific Railway are operated the same as the huge ocean liners. At Port McNicoll the visitor sees a man made harbor, surrounded by a village which has been developed from the original within the last twenty years. About an hour and a half after leaving port, a huge cove below the dining hall, and going down the traveller finds the dining-room spacious and comfortable which greatly whets the already huge appetite.

After dinner a promenade of the broad white decks, as motionless as the city streets, but with what a difference! The fresh clean breeze and the sun strikes the horizon leaving behind a sense of peace and well-being. Hot upon host of grace the stern, crying wings appear over the hungry gull. So still they are as to appear motionless; a floating bit of white feather; but a chance opening of the cooks galley port hole brings with the violence of the blizzard, with a strength and speed that is amazing.

Land slowly disappears, and the island, are lost in the soft enfolding darkness. Stars come out, and a white moon floods the lake with a shimmering luster. All is quiet—a friendly intimate quiet—broken

here and there by a merry laugh, a passing footstep, the throb of the great engine and the spark on the wireless up above. A little later we pass the protruding Bruce peninsula, then the Manitoulin Island, the home of the Great Spirit. In the distance can be seen the blinking light house at Cabot's Head. Lonely houses at the Flower Pots and in the furthest distance ahead, Cove Island, the marking point of the entrance to Lake Huron.

These steamships, the "Keewatin," "Manitoba" and "Assiniboia" of the Canadian Pacific service are first-class in every way, and ply these inland waters from May 21st to September 28th. The journey occupies the better part of three days, with every wave bringing further charm and amusement at the unfolding beauty of the trip.

Hockey Notes.

Stony's Senior hockeyists played the Duffield team on local ice, Sunday afternoon. Some very good play on each side was seen, but the visitors always seemed to have the upperhand when it came to stick-handling. Duffield team tried to make a runaway game of it, at one-time, scoring 2 goals in a 5 minute run. Toward the close of the game Duffield's goal-keeper abandoned his position, but the Stoneys were unable to take advantage of this opportunity by their failure to get thru the visitors' defense. Final score: Duffield 4; Stony 2. Referee, C. Fuhr.

Spruce Grove News

The Councillors of Spruce Grove M.D. held their meeting on Monday, with all the councillors present. A delegation from the Adams Road Machinery Co. was present.

Mr. Suder, who has been farming on the Baseline east of town for a number of years, is leaving this week for his new home near Kitseott, where he has purchased a half-section.

Mr. Trueman, of Winterburn district, is moving, with the family, up to the Onoway district, where he has purchased a 320 acre farm.

Where She Got Scratched.

Miss Hazel Moneyheffer, who lives near town, was thrown from her horse last week. The fall sprained her wrist, bruised her side, and scratched her considerable. Ransom (Kan) News.

Calendar.

March—
9—Mecklenburg at the Royal Hotel.
10—Auction sale of horses, in Stony Plain.
16—A R. Gillies' big sale at Clover Bar.
17—P. Odenbach's Sale.
20—Val Mohr's Sale.
April—
6—Good Friday
9—Edmonton Spring Livestock Show.
18—District Court holds a session at Stony.

Stony Plain and District.

Mr. Geo. Schadek, so well and favorably known to everyone in this and surrounding districts, left yesterday with his family for his new location in the Wembley district. George took up a carload of settler's effects.

While returning home from the local High school with some pals on Monday last, and passing along Third St. west, young Mr. Giles Clarke had the misfortune to slip off the icy luluibithic walkway, and strike his right knee on a piece of broken crockery imbedded in the ground. A nasty gash was the result, which will confine this popular young man to the house for some time.

An institute meeting will be held tomorrow afternoon at the home of Mrs. Henry Oppertshauser.

Mr. Benj. Lawton, Game Commissioner for Alberta, paid the local game guardians a visit last week. His visit was timely, as there happened to be a number of trappers in town at the time, with problems to be solved, and explanations were given to these, to everyone's satisfaction, by Mr. Lawton.

Meridian Lodge members held their monthly session on Tuesday evening, in Masonic hall.

A heavily-laden truck, west bound, skidded and struck the bridge on the Baseline, just west of Meridian road, on Friday afternoon, damaging a wheel on the truck and breaking the guard rails.

The local registrar for vital statistics is Mrs. J. H. Foerster.

Meredith Brothers made a big shipment of cattle last week, and have arranged for another shipment today. Meredith Bros. have changed their phone number to R304.

The moccasin dance at Duffield rink, Friday night, was well attended. Tyrell's orchestra supplied the music.

Mr. John B. Hodgson of the Bright Bank district, held a very successful auction sale on Tuesday, the 6th. Mr. Hodgson is leaving shortly on a trip to the East.

A play "The Bridge Party" will be given in Heatherdown Hall tomorrow evening, Mar. 9. A dance will follow.

M. M. Mecklenburg, the well-known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, March 9th. See him and see well.

YOU CANNOT AFFORD TO BE WITHOUT YOUR LOCAL PAPER—SUBSCRIBE NOW AND KEEP PAID UP.

"Rats!"

There is a large percentage, apparently, of the licensed and non-licensed trappers who are unaware of the fact that the houses of muskrats, their feederies or dens on the shore are not to be molested, even in the open season set by the Game Department.

A survey made last week in the nearby areas show that poachers have committed irreparable depredations on the haunts of the muskrats before the season opened on March first.

Farmers who had had muskrats on their farms and were complying with the Act regarding the closed season, found to their chagrin when the season opened, that their places had been invaded and the rats pretty well cleaned out.

The penalty for this is severe, when the offenders are caught.

It is intimated that traps may be placed in the muskrats' runways, or holes may be chopped in the ice in the vicinity of the houses; but, under no circumstances are the houses to be disturbed.

There seems to be considerable misapprehension at the present time among trappers as to the legality (or otherwise) of shooting muskrats. It would appear that the shooting of rats has not, as yet, been prohibited, as the Act at present reads, "hunt, trap or kill."

The open season for muskrats is north of the North Saskatchewan River only; and this closes on Monday, April 30th.
